Implementing Enterprise-wide Data Protection: A Highly Complex Problem

Disparate encryption tools and evolving regulations intensify complexity.

47%

Of organizations report that they have been breached or failed a compliance audit in the past year.⁶

39%

Of companies see complexity as their top barrier to implementing data security in multi-cloud environments.⁷

6. PwC's Risk Atlas 7. Thales Data Threat Report 2020

Simplify with Integrated Data Protection

Take a platform-based approach to data security, with integrated solutions to reduce complexities and costs.

up to 70%

Aberdeen found that a single platform for a multi-database environment can be 46%-70% less expensive to operate than using different solutions that support different database vendors.⁸

43.5%

Of executives state encryption is the top tool needed to meet new Privacy Requirements like GDPR.⁹
