

CipherTrust Manager

Centralize and simplify data security policies and key management anywhere

Overview

CipherTrust Manager enables organizations to centrally manage encryption keys for Thales CipherTrust Data Security Platform and third party products. It simplifies key lifecycle management tasks, including secure key generation, backup/restore, clustering, deactivation, and deletion.

It provides role-based access control to keys and policies, multi-tenancy support, and robust auditing and reporting of all key management and encryption operations.

CipherTrust Manager is the central management point for the CipherTrust Data Security Platform. It provides a unified management console that makes it easy to discover and classify data, and to protect sensitive data wherever it resides using a comprehensive set of CipherTrust Data Protection Connectors from Thales.

CipherTrust Manager is available in both virtual and physical form-factors that integrate with FIPS 140-2 validated Thales TCT Luna T-Series and third-party Hardware Security Modules (HSMs) for securely storing master keys with highest root of trust. These appliances can be deployed on-premises as well as in private or public cloud infrastructures. This allows customers to address compliance requirements, regulatory mandates and industry best practices for data security.

Benefits

- Centralized key management for multiple on-premises data stores and cloud infrastructures
- Reduced risk with unified data discovery, classification and sensitive data protection
- Simplified management with self-service licensing portal and visibility into licenses in use
- Cloud friendly deployment options with support for AWS, Azure, Google Cloud, VMware, Oracle Cloud Infrastructure and more
- Support for superior key control with Thales TCT's T-Series HSM
- Unparalleled partner ecosystem of integrations with leading enterprise storage, server, database, application and SaaS vendors

CipherTrust Manager

Key Capabilities

- **Full Key Lifecycle Management and Automated Operations:** CipherTrust Manager simplifies management of encryption keys across their entire lifecycle, including secure key generation, backup/restore, clustering, deactivation, and deletion. It makes automated, policy-driven operations easy to perform, and generates alarms for events of interest.
- **Unified Management Console:** Provides a unified console for discovering and classifying sensitive data integrated with a comprehensive set of CipherTrust Data Protection Connectors to encrypt or tokenize data to reduce business risk and satisfy compliance regulations.
- **Centralized Administration and Access Control:** Unifies key management operations with role-based access controls and provides full audit log review. Authenticates and authorizes administrators and key users using existing AD and LDAP credentials.
- **Secrets Management:** Provides the ability to create and manage secrets and opaque objects for usage on the platform.
- **Multi-tenancy Support:** Provides capabilities required to create multiple domains with separation of duties to support large organizations with distributed locations.
- **Developer Friendly REST APIs:** Offers new REST interfaces, in addition to Key Management Interoperability Protocol (KMIP) and NAE-XML APIs, allows customers to remotely generate and manage keys.
- **Flexible HA Clustering and Intelligent Key Sharing:** Provides the option of clustering physical and / or virtual appliances together to assure high availability as well as increased encryption transaction throughput.
- **Robust Auditing and Reporting:** Includes tracking of all key state changes, administrator access, and policy changes in multiple log formats (RFC-5424, CEF, LEEF) for easy integration with SIEM tools.
- **Broad Partner Ecosystem:** CipherTrust Manager provides centralized key management for wide variety of storage partners via KMIP and database partners via Transparent Database Encryption (TDE).
- **Root of Trust:** CipherTrust Manager can use Thales TCT's Luna T-Series HSMs as root of trust. Meeting government mandates for U.S. Supply Chain, the high-assurance, tamper-resistant Luna T-Series HSMs are designed, developed, manufactured, sold, and supported in the United States. CipherTrust k160 uses a removable FIPS 140-2 certified token or high assurance token as a root of trust.

CipherTrust Manager Features

Features	Virtual Appliances		Physical Appliances	
	k170v	k470v	k160	k570*
Administrative Interfaces	Management Console, REST API, kscfg (system configuration), (ksctl (Command Line Interface)			
Network Management	SNMP v1, v2c, v3, NTP, Syslog-TCP			
API Support	REST, NAE-XML, KMIP, PKCS#11, JCE, .NET, MCCAPI, MS CNG			
Security Authentication	Local User , AD/LDAP , Certificate based authentication			
System Formats	RFC-5424, CEF, LEEF			
Supported HSMs for Root of Trust	Luna Network HSM, Luna T-Series Network HSM, Luna Cloud HSM, AWS Cloud HSM, Azure Dedicated HSM, IBM Cloud HSM, IBM Cloud Hyper Protect Crypto Services Cloud HSM	Luna Network HSM, Luna T-Series Network HSM, Luna Cloud HSM, AWS Cloud HSM, Azure Dedicated HSM, IBM Cloud HSM, IBM Cloud Hyper Protect Crypto Services Cloud HSM	Removable token HSM using either a FIPS 140-2 Certified Token or High Assurance Token	Embedded FIPS 140 level 3 & CNSS approved Luna T-series HSM
Maximum Number of Keys	Tested up to 1M Keys (more possible with appropriately sized virtual environments)	Tested up to 1M Keys (more possible with appropriately sized virtual environments)	Maximum capacity of 10,000 symmetric keys. Maximum of 100 keys using concurrent connections.	1 Million Keys
Maximum Domains (multi-tenancy)	100	1000	100	1000

*Thales TCT can also offer CipherTrust k470 physical appliance. CipherTrust k470 offers the same features and specifications as CipherTrust k570 but does not include an embedded HSM. CipherTrust k470 utilizes an external FIPS Certified Physical or Cloud HSM as secure root of trust.

Appliance Specifications

Physical Appliances	k160	k570
Dimensions	6.5" x 4.0" x 1.5" (165.1mm x 101.6mm x 38.1mm)	19" x 21" x 1.725" (482.6mm x 533.4mm x 43.815mm)
Hard Drive	1x 128GB mSATA SSD SE	1x 2TB SATA SE (Spinning Disk)
CPU	Atom E3845 Processor SoC	Xeon E3-1275v6 Processor
RAM	8GB	16GB
NIC Support	1x 1GB	4x1GB or 2x10Gb/2x1Gb (NIC Bonding capable)
Rack Mount	Standard 1U shelf mount can be optionally purchased (can house up to two k160s)	Standard 1U rack mountable Sliding rails can be optionally purchased
Power	External power supply included, locking DC connector	Dual hot swappable power supplies
Safety and Compliance	FCC, CE	CSA C-US, FCC, CE, VCCI, C-TICK, KC Mark, BIS
Mean Time Between Failure	170,869 hours	153,583 hours
FIPS Support	Virtual appliance is FIPS 140 level 1 (pending). Integrates with 3rd party HSMs including FIPS 140 Level 3 validated Luna T-Series	Embedded FIPS 140 Level 3 & CNSS approved Luna T-series HSM

Virtual Appliances	k170v	k470v
System Requirements	<ul style="list-style-type: none"> RAM (GB): 16 Hard Disk (GB): 100 NICs: 1 or more CPUs: up to 4 CPU max 	<ul style="list-style-type: none"> RAM (GB): 16 or more Hard Disk (GB): 200 or more NICS: 2 or more CPUs:5 or more
Clouds/Hypervisors Supported	<ul style="list-style-type: none"> Public Clouds: AWS Cloud, Microsoft Azure, Google Cloud Enterprise (GCE), Oracle Cloud Infrastructure (OCI) Private Clouds/Hypervisors: VMware vSphere (6.5, 6.7 and 7.0), Microsoft Hyper-V, Nutanix AHV, OpenStack (QCOW2) <p>*AWS GovCloud, Azure Government Cloud also supported</p>	

About Thales Trusted Cyber Technologies

Thales Trusted Cyber Technologies, a business area of Thales Defense & Security, Inc., is a trusted, U.S. provider of cybersecurity solutions dedicated to U.S. Government. We protect the government's most vital data from the core to the cloud to the edge with a unified approach to data protection. Our solutions reduce the risks associated with the most critical attack vectors and address the government's most stringent encryption, key management, and access control requirements.
