

Secure File Gateway for Email

Completely secure every email that enters your organization.

Emails Are the Most Popular Target for Malicious Attacks

Email is so essential to work, most employees use it without thinking. Hackers easily exploit this by targeting individuals in your company agency with weaponized files they least suspect. And because current solutions aren't designed to catch every threat, we're always one click away from disaster.

Votiro for Email: Secure 100% of Emails with Positive Selection

Secure File Gateway singles out only the elements of emails known to be fully secure, guaranteeing they are 100% safe. Now employees can open every email and file attachment with complete peace of mind, and without any delays or disruptions to business.

Defend all emails & attachments

Protects the entire email channel from malicious threats, ensuring your email is 100% safe

Protect every email without blocking access

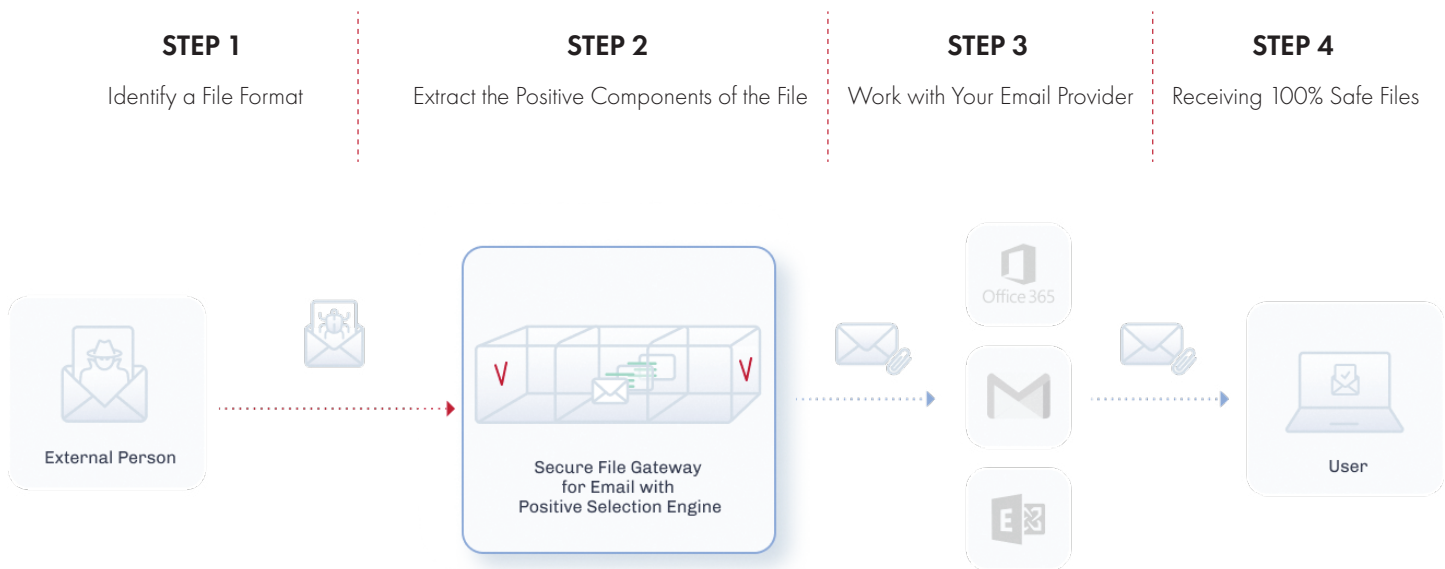

See the emails you need right away, without waiting for IT middle-men to unblock access

Be more productive with zero interruptions

Runs invisibly in the background, with virtually no latency

How It Works

Fits Right in. Won't Ever Know It's There.

Secure File Gateway singles out only the elements of emails known to be fully secure, guaranteeing they are 100% safe. Now employees can open every email and file attachment with complete peace of mind, and without any delays or disruptions to business.

- Easy Implementation: Less Than 10 Minutes
- Seamless Integration with Existing Solutions
- Zero training required
- Supports Both Cloud & On-Prem

Votiro knows files.

With our deep understanding in file composition and weaponization, we developed an entirely new approach to file security. One that doesn't just block any threat it could find – it eliminates threats from entering in the first place. With Votiro, files simply don't pose a threat to your organization anymore.

Votiro Secure File Gateway for email is available for sale to the U.S. Federal Government exclusively through Thales Trusted Cyber Technologies.

About Votiro

Founded in 2010 by leading file security experts, Votiro's new approach to file security works invisibly in the background, completely eliminating threats while ensuring zero interruption to business. Votiro is a Gartner Cool Vendor award winner and certified by the International Standard of Common Criteria for Information Technology Security Evaluation (ISO/IEC 15408).

About Thales Trusted Cyber Technologies

Thales Trusted Cyber Technologies, a business area of Thales Defense & Security, Inc., protects the most vital data from the core to the cloud to the field. We serve as a trusted, U.S. based source for cyber security solutions for the U.S. Federal Government. Our solutions enable agencies to deploy a holistic data protection ecosystem where data and cryptographic keys are secured and managed, and access and distribution are controlled.
