

# Secure File Gateway for Web Applications

## Secure all file uploads and receive documents completely risk-free

### Document Uploads Can Come from Anywhere

Whether it's contracts, claims or applications, accepting uploaded files from the web is necessary for your organization to run. But there's no telling where these files came from, or what threats could be hiding inside them. Today's detection-based tools simply aren't designed to catch every threat, which means one dangerous upload could mean a major disaster for your organization.

### Secure File Gateway for Web Applications Secures 100% of uploads with Positive Selection.

Secure File Gateway singles out only the elements of files known to be fully secure, guaranteeing each and every upload is 100% safe. Now you can accept every upload without ever wondering if you are exposing your business to risk.

#### Know every upload is completely safe

Ensures every uploaded file is harmless before it enters your organization

#### Be more productive with zero interruptions

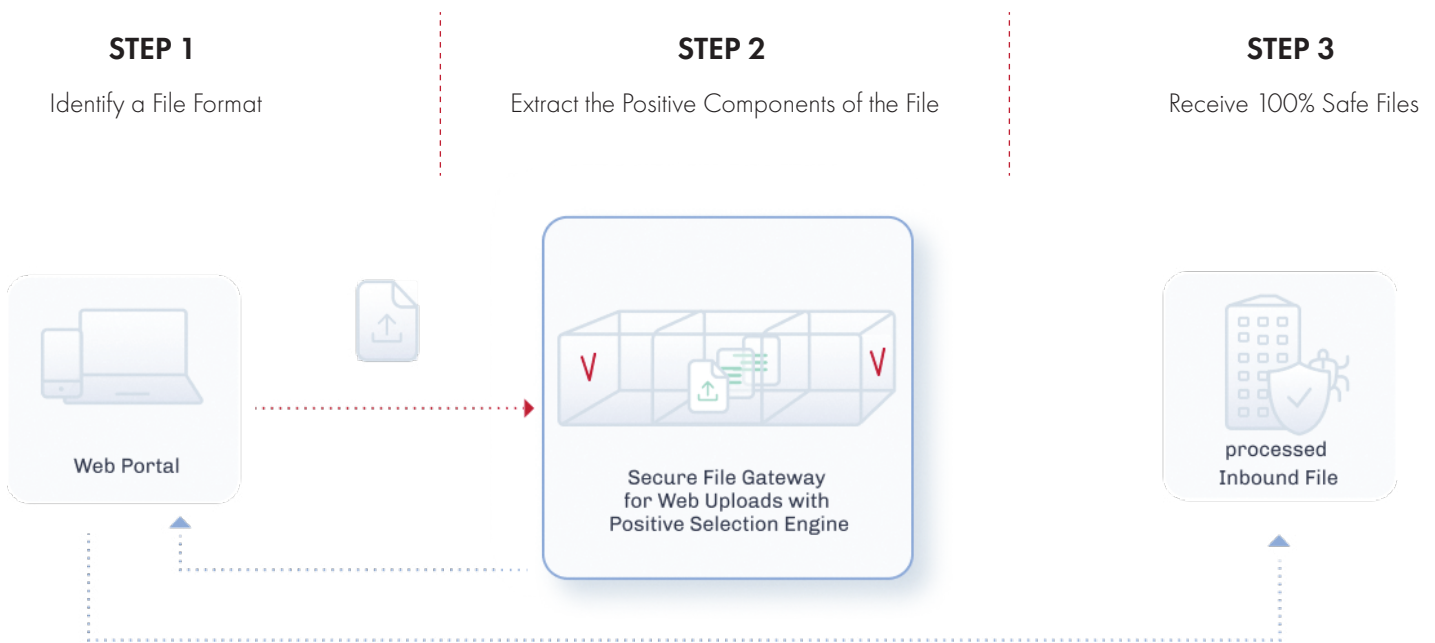

Works without any latency, protecting files invisibly in the background

#### Protect your bottom line

Prevents the potential loss of revenue due to losing business-critical files

## How It Works

### Fits Right in. Won't Ever Know It's There.

Secure File Gateway singles out only the elements of emails known to be fully secure, guaranteeing they are 100% safe. Now employees can open every email and file attachment with complete peace of mind, and without any delays or disruptions to business.

- Easy Implementation: Less Than 10 Minutes
- Seamless Integration with Existing Solutions
- Zero training required
- Supports Both Cloud & On-Prem

### Votiro Knows Files.

With our deep understanding in file composition and weaponization, we developed an entirely new approach to file security. One that doesn't just block any threat it could find – it eliminates threats from entering in the first place. With Votiro, files simply don't pose a threat to your organization anymore.

Votiro Secure File Gateway for email is available for sale to the U.S. Federal Government exclusively through Thales Trusted Cyber Technologies.

### About Votiro

Founded in 2010 by leading file security experts, Votiro's new approach to file security works invisibly in the background, completely eliminating threats while ensuring zero interruption to business. Votiro is a Gartner Cool Vendor award winner and certified by the International Standard of Common Criteria for Information Technology Security Evaluation (ISO/IEC 15408).

### About Thales Trusted Cyber Technologies

Thales Trusted Cyber Technologies, a business area of Thales Defense & Security, Inc., protects the most vital data from the core to the cloud to the field. We serve as a trusted, U.S. based source for cyber security solutions for the U.S. Federal Government. Our solutions enable agencies to deploy a holistic data protection ecosystem where data and cryptographic keys are secured and managed, and access and distribution are controlled.
